

IVI News Update

IVI is excited to announce its first release of a 4 step Digital Transformation Programme that is now available.

Digital Transformation signifies a fundamental change in how technology, people, and processes, will combine to radically enhance an organisation.

IVI's Digital Transformation Programme is a hands-on, organization-wide programme that will deliver the best possible business outcomes in 4 simple steps. It offers a suite of support components such as:

- Training/Workshops
- Assessments
- Knowledge assets
- Curated external knowledge
- Tools and methodologies

These components are clearly structured on a roadmap guiding 'when to use them' and directions on 'how to use them' and all offered on a highly functional platform.

IVI's programme will support organizations and de-risk their actions and investments enabling an organization to define and start a **Digital Transformation Programme** based on capability improvement that is customized to its needs.

As with all **IVI** releases, our Research Team will continue to carefully study the programme's results; we look forward to sharing our developments with our members and readers on a monthly basis.
