IVI News Updates

IVI Autumn Summit: Leadership and Talent Management for Digital Transformation Thursday 17th September 2015

Taking your organisational capabilities to the next level

Do you have 21st century technology but a 20th century corporate structure? Are you equipped to attract, develop and retain digital talent? Do you know what it takes to lead in an era of digital transformation?

According to the Harvey Nash 2015 CIO Survey, digital innovation is dominating the agenda of technology leaders, but many companies are struggling to manage it. The pace of digital and the race to innovate has left many organisations lacking an enterprise-wide digital strategy and desperately seeking to acquire the right skills and talent. [Read more](#)

IVI New offices, Eolas Building

We are delighted to announce that IVIs offices are now located in the newly constructed high spec Eolas Building on the North Campus. We look forward to welcoming you to our new space during the Autumn Summit.

IVI Global Community Virtual Event

To create value, we must manage capability improvement - A new programme from IVI

The availability and power of technology is only valuable when it is deployed and used to deliver the business goals. IT-CMF body of knowledge has been instrumental in helping organizations identify, assess and plan the required capabilities and practices for driving business value of Information technology. Recently, IVI has been focused on taking the next steps - Once planned, how do organizations manage processes, tools and training need to be channelled to deliver the planned impact from capability improvement.

IVI has designed a roadmap for building capability - a Capability Improvement Programme (CIP). This is a structured and paced directional guide, with the flexibility to deal with different organizational context and ambitions.

We are glad to have Martin Delaney, GM for IVI, to tell us more about CIP, and address any questions you might have. [Register here](#)

New MSc in IT Enabled Innovation

The Maynooth University Business School in conjunction with IVI will be launching an MSc course in IT-Enabled Innovation this year and is actively looking for prospective students. This course differs from many other IT programmes because it has leading-edge industry inputs and also because it sets IT Management in the context of the business environment. Students will engage with not only with IT professionals, but also with the broader business community - and will study key business aspects of marketing, strategy, human resource management, change management, finance, project management and much more. This is a comprehensive business masters that will equip business professionals for a wide range of career options.
