IVI News Update

Digital Summit 2019

Thank you to all who attended our **annual Digital Summit** on 12th June and to our Speakers & Panel members. Your attendance and support made the day a great success and we really appreciate it.

We were delighted to collaborate with **Enterprise Ireland** this year and had an exciting line-up of international and local speakers from both practitioner and academic backgrounds discussing a wide range of very interesting topics.

This collaborative event was part of our engagement process with Irish based organisations and with Industry working the challenges together and learning.

Our **theme** this year was "**As technology drives radical changes in organisational design and behaviour, new opportunities for organisations, particularly in service innovation, continue to evolve**".

We had the perfect balance between academia and industry, coming together in the **BNY Mellon** presentation on their summary collaborating with IVI under the EI IPP initiative.

Proving particularly popular on the day was our very successful **interactive Workshops (on Innovation Activities, Innovation Outcomes & Enabling Environment)** offering practical insights to bring back to your organisations to help embrace the opportunities and overcome the challenges of digital transformation.

Presentations are now available for you to download **[here](#)**.

Our team is busy planning our next event and we look forward to seeing you again soon!

IVI announces new Mastering Business Innovation Education Programme for September 2019

Any effective business leader will tell you that introducing new technology is the easier part of digital transformation. True transformation demands more than just new technologies. It requires innovation, vision, agility, and the commitment to rethink and retool the three main attributes of the modern enterprise - people, processes, and technology.

IVI is pleased to announce the **Mastering Business Innovation Programme** (or **MBI**) to help leaders begin the transformation journey. As part of the programme, you will identify transformation challenges for your business. You will be expertly guided to begin addressing your business priorities through the innovation and Design process. We will launch this dynamic and immersive facilitated executive education programme in **September 2019**, and you can participate.

To register your interest email info@ivi.ie. Spaces are limited so register early. More details about the programme in our next Newsletter. In the meantime click **[here](#)** to download the MBI brochure.

Innovation & Agility Workshops

Whatever stage your organisation is at with **Innovation & Agility**, these workshops are for you:

- Do you wonder how to encourage a more innovative, agile, and adaptable mindset in your organisation?
- Are you struggling to identify the 'right' opportunities to follow?
- Are you trying to replicate local success across the rest of your organisation?

Whether you are starting your journey, or well on your way, **IVI's Innovation & Agility workshops** will provide an opportunity to broaden your understanding of innovation in organisations and develop your skills in this area. These **interactive sessions** are designed to allow participants to share their own experiences, address their particular challenges, and learn from other practitioners.

Our Innovation & Agility workshops will be launching in September 2019. Further information, including registration details, will be released in the coming weeks. **In the meantime email info@ivi.ie to register your interest.**

Acknowledgement of Contributors to IT-CMF - are you listed?

Our global list of contributors to the development of IT-CMFs can be found at www.ivi.ie/contributors. While we have gone to great lengths to ensure this page is accurate as possible, we would be delighted if you would check and let IVI@nuim.ie know if you or a colleague's name should be included. Thank you.
