IVI Events Update

Innovation Value Institute Spring Summit 2016 Review

Sharpening your IT Capability for Digital Business Success

IVI was delighted to hold its recent Spring Summit in New Jersey which was kindly hosted by DTCC in its Jersey City offices. The event explored "Sharpening your IT Capability for Digital Business Success" and included speakers and panelists from organizations such as DTCC, EY, Intel, The Boston Consulting Group, BNY Mellon, Mitovia, IVI and BearingPoint.

The summit was widely acclaimed as an excellent and must-attend event by attendees numbering more than 100 and representing over 30 organizations from around the world including Ireland, North America, Australia, Canada, UK and India. [Read more](#)

IVI News Update

Capability Improvement -Key Lessons Learned from Executive Assessments

IVI Research is interested in the experiences and the successes of those undertaking IT-CMF Executive Assessment (EA) in building their organizational capabilities. In this Research Brief we investigate the experiences of ten large organisations who undertook one or more IT capability maturity assessments between 2010 and 2015 using the IT-CMF EA tool as a part of their IT capability improvement programme and we explore the implications and 'lessons learned'. [Read more](#)

Request for input on DevOps capability

The growing importance of agile delivery exemplifies the importance for organizations in shifting to a DevOps environment. To better define this phenomenon across differing contexts, IVI are launching a 6-week research study to explore the impact of DevOps on IT performance.

This research will consist of a state-of-the-art literature review, supplemented by company interviews focusing on:

- How do practitioners typically define what the impact of DevOps could be for their organisation?
- Typical challenges when moving to a DevOps environment?
- What do practitioners feel are the successful practices for implementing DevOps?

To participate, IVI would like to interview organisations (duration will be 45min) to explore the above topics. Participants will get to review and comment on early drafts of the resultant research whitepaper, plus have the opportunity to connect with peers in other organisations.

Please contact clare.thornley@nuim.ie and conor.obrien@nuim.ie if you would like to participate.

Examining IoT in the context of digital transformation: Invitation to Participate

As one of the fastest growing areas, the Internet of Things (IoT) presents considerable potential for driving economic value and societal change. However to achieve such transformation, organizations can face several IoT adoption barriers or challenges. To support better organisational management practices for IoT exploitation, IVI will shortly publish a state-of-the-art review of:

- IoT adoption drivers and enablers (i.e. the value proposition for IoT deployment)
- Barriers to, or challenges of, integrating an IoT environment into the enterprise
- Best practice examples of IoT deployment success.

To complement this work, IVI is now opening a brief cross-industry consultation window, in the format of 1:1 (45min) telephone interviews. Organizations of particular interest include large, multi-national enterprise IoT solution adopters/end users. Please contact marian.carcary@nuim.ie by April 5th to register your interest.

Free eBook with every IT-CMF book purchase

In order to receive your free eBook with your purchase, you must order directly through the [IVI bookstore link](#)

Acknowledgement of Contributors to IT-CMF - Are You Listed?

We recently published our global list of contributors to the development of IT-CMF at www.ivi.ie/contributors. While we have gone to great lengths to ensure this page is accurate as possible, we would be delighted if you would check and let IVI@nuim.ie know if your or a colleague's name should be included. Thank you.
