

IVI News Update

Design Science Summer School

The Design Science (DS) component of the Design Thinking & Design Science Summer School gave the students an opportunity to understand the fundamental principles and concepts underpinning this research approach. Michael Hanley from the Innovation Value Institute at Maynooth University led the discussion with the class as they explored DS methods and models. IVI's research activities around using technology for organisational capability as represented in the IT Capability Maturity Framework (IT-CMF) provided a working example of DS in a real-world context, focussing on how DS provides utility to both academic researchers and organisations in the field.

During this part of the course, Professor Piero Formica of the University of Padua - a world authority on innovation - gave a talk on the value of "creative ignorance" as a means to interrogate and explore new ways of doing things. To conclude the Summer School, Professor Iijima from Tokyo Institute of Technology gave a very practical talk on using the Design & Engineering Methodology for Organizations (DEMO) approach to capability building.

On the final day of the event, our cohort from Japan went on a cultural tour of Dublin, while the Maynooth University and DCU group undertook a period of reflective practice. At the end of a very intense and enjoyable week, the view was that the Summer School had been a successful event for both Maynooth University and for IVI.

We plan to run the Summer School in 2018; if you're interested in finding out more about the event, contact the Maynooth University International Office at <https://www.maynoothuniversity.ie/international>.

IVI research team at ECISM

Four members of the IVI research team recently represented IVI at the 11th European Conference on Information Systems Management (ECISM). The conference was held in Genoa, Italy on the 14th and 15th of September and attracted a global representation of both academic and practitioner delegates from UK, USA, Australia, Russia, South Africa, Ireland, Italy, Finland, Sweden, France, Poland, Switzerland, Romania, Indonesia, and Ecuador. New: IT-CMF - A Management Guide - Based on the IT Capability Maturity Framework™ (IT-CMF™) 2nd edition

This management guide offers an introduction to the IT Capability Maturity Framework™ (IT-CMF™), 2nd edition. The IT-CMF offers a comprehensive suite of tried and tested practices, organizational assessment approaches, and improvement roadmaps covering key IT capabilities needed to optimize value and innovation in the IT function and the wider organization. It enables organizations to devise more robust strategies, make better-informed decisions, and perform more effectively, efficiently, and consistently.

Acknowledgement of Contributors to IT-CMF - are you listed?

We recently published our global list of contributors to the development of IT-CMF at www.ivi.ie/contributors. While we have gone to great lengths to ensure this page is accurate as possible, we would be delighted if you would check and let IVI@nuim.ie know if you or a colleague's name should be included. Thank you.
