DATA GOVERNANCE

## Data Governance Research Application Domains include:

**EMPOWER**  
DATA GOVERNANCE

# Leadership in Data Governance

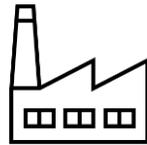

- Collaborating with leading companies, MNCs and policy makers.
- Supported by local business support services and regulatory expertise in data governance issues such as data protection and data quality.
- Irish researchers already providing international leadership in this area: EU High-Level Expert Group on Artificial Intelligence, Big Data Value Association (BDVA), ISO/IEC SC40 Data Governance and SC42 AI standards initiative.
- Data Governance Act / Digital Europe
- Irish Government Policy Makers and State Agencies committed to action:
  - The Digital Ireland Framework 2022
  - Data Sharing and Governance Act 2019
  - National Data Governance Board 2021
  - National AI Strategy 2021
  - Office of the Data Protection Commissioner
  - Office of the Government CIO
  - Department of the Taoiseach
- Empower is represented at European and International Public Policy Working Groups

# Empower – Data Governance Community of Practice

Consists of a **community** of like-minded organisations and individuals who contribute **knowledge** to **establish a repository of Data Governance Practices**.

Using **open-innovation**, a community can achieve results far beyond what any one organisation could achieve on its own by leveraging consortium resources, knowledge and best practices to design for success.

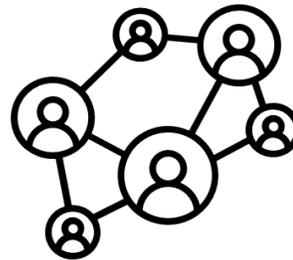

Enterprises & SMEs

Professional Services

**Empower – Community of Practice**

Government & Public Sector

Academia

Professional Associations

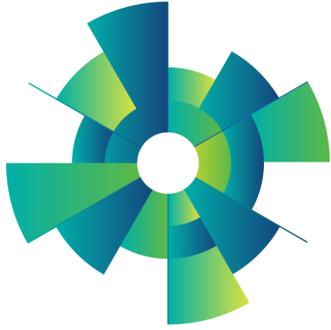

Technology & Vendors

# Data Governance Community of Practice

- Topic Prioritisation and Next Steps (Working Groups)
- Interested to join the Community of Practice or collaborate with the Empower Programme
