Agenda &
Registration

Researchers at IVI are leading an innovative project to to
reduce Virgin Material in the construction sector

VISION – A project funded by the Environmental Protection Agency Ireland- develops a Value- Centric Approach for Circular Businesses to reduce Virgin Material in the construction sector, facilitating a Green and Circular Economy. VISION addresses the knowledge gap to identify opportunities to minimize the use of virgin materials used in the growing construction sector in Ireland. VISION will design and show the feasibility of circular business models together with recommendation for policies, incentives and standards by reviewing and evaluating different approaches that are gaining traction internationally. It is based on an industry-academic-policy making collaboration supported by the Digital Construction Cluster at the Innovation Value Institute at Maynooth University. Organisations interested in collaborating, please contact project co-ordinator Prof. Markus Helfert markus.helfert@mu.ie or info@ivi.ie.

IVI Webinar Series: Integration of IoTs data and BIM for Energy Management in Buildings May 25th 3pm (IST)

IVI Webinar Series 2023
Digital Construction
25th May 3pm (IST)

The availability of valuable data from Internet of Things (IoT) devices in buildings has the potential to transform building construction, administration, and management. In this webinar, the challenges in facilities and energy management in the context of IoT integration with other digital tools/data available in the construction and building industry, as well as several measures to advance IoT technology implementation, will be discussed.
