Shaping the Digital Future – The European Dimension

EU’s goals to reach over the next decade:

- a digitally **skilled** population and highly skilled digital professionals;
- secure and sustainable digital infrastructures;
- **digital transformation of businesses**;
- digitisation of public services.

- Digital technologies have the potential to improve our living standards, life expectancy and quality of life. It is widely agreed that such technologies contribute positively to productivity and economic growth.
- The World Economic Forum estimates that the combined global value of digital transformation to society and industry will exceed US$100 trillion by 2025.
- The Digital Europe programme (for 2021-2027)

Digital Enterprise Capabilities and Transformation Paths

01. Planning and Execution Management
   - Establishing a coherent direction and actions regarding how digital can assist the organization to compete and thrive

02. Risk, Controls, and Cybersecurity Management
   - Mitigating threats to digital business objectives, and enforcing regulatory obligations, standards, policies and guidelines
   - Leveraging the capabilities of, and creating synergies amongst, participants involved in the value chain supporting digital business objectives

07. Delivery and Operations Management
   - Improving the return on investment from technology resources
   - Leveraging data to improve decision-making and business outcomes

Risk, Controls, and Cybersecurity Management

Digital Transformation Path and Roadmap

Maturity Levels
- BP Business Planning
- GOV Governance
- FF Funding and Financing
- PDP Personal Data Protection
- RM Risk Management
- EAM Enterprise Architecture Management
- BAR Benefits Assessment and Realization
- SO Solutions Delivery
- SRF Service Provisioning

Establishing a coherent direction and actions regarding how digital can assist the organization to compete and thrive
